

Pabineau First Nation Community Planning Survey UPDATE

Identifying Strengths and Issues

Facts and people's perceptions about what works (strengths) and what doesn't work in our community (issues) are identified and organized. This is significant because it brings attitudes and values to the surface and identifies areas which require further research. Below are some statements that I would like you to take the time to finish off. Remember, you don't have to base your answers on facts or have proof for your feelings; I want you to express how you think and feel and complete the sentences truthfully.

"I wish the community was like..."

"My dream for the community is..."

"I think the communities major issues are..."

"I think the communities major strengths are..."

"I think success looks like..."

Please write down a statement pertaining to our strengths and issues on each category.

Health
