

Hello Fellow Pabineau members,

Well it has been Since June that I have been employed in Pabineau doing Capital Construction work and I felt it was time to let everyone know how things are going so far. For those who don't know who I am, I am Terry Richardson and I recently was hired by our community in the position of Capital Construction after having retired from the military. Being that I am still young and able, I was persuaded by the present chief and council to apply for the position that I am presently filling.

Now for the important stuff....things are really progressing well here in Pabineau under the chief and council and lots of new development is occurring in our small community. The most visible of course is our Sea food market and future gas bar, which came into being due too the hard work of our Economic Development Officer Rose Kryszco who has taken this project from the very beginning to the point where it is now, developing it into a very successful business. Since my job is Capital Construction I don't want to have members of the community feel slighted if I don't mention them, but I am dealing with mostly construction issues.

Another soon to begin construction project will be our permanent Arbor which will be located down behind the store on our new POWWOW grounds by the river. Under the vision of our chief and council it will be original and something that Pabineau can be proud of. Also of even more importance is the Health Center to be constructed at Pabineau which will be another building that will provide us with the much needed health care and as well our chief has secured some dental services that will be provided at this center as well. It will be something that will ensure the health and wellness of our people well into the future.

There are other projects on the board as well...and as they come forward I will be sure to ensure that all members of Pabineau are able to know where we are in the development phase of these. As you can see Pabineau is moving forward under the present chief and council which is very important if we are to become a more self sufficient community less reliant on the dollars delivered from INAC. I look forward to writing my next article to show my fellow community members what a great job our chief and council are doing with the help of all community members in the development of Pabineau into the future. I have witnessed first hand the hard work and dedication that our present chief and council are doing and believe me when I say they are working hard to ensure the prosperity and wellness of our community.

It is important that we leave behind to our youth an ability to grow and prosper and as well for those of us within the community it is time to heal and say not what the community will do for us but what can we do for the community. Till next article enjoy a few pictures of the Pabineau Seafood market that I have attached as well as the new POWWOW grounds.
